Key Insights

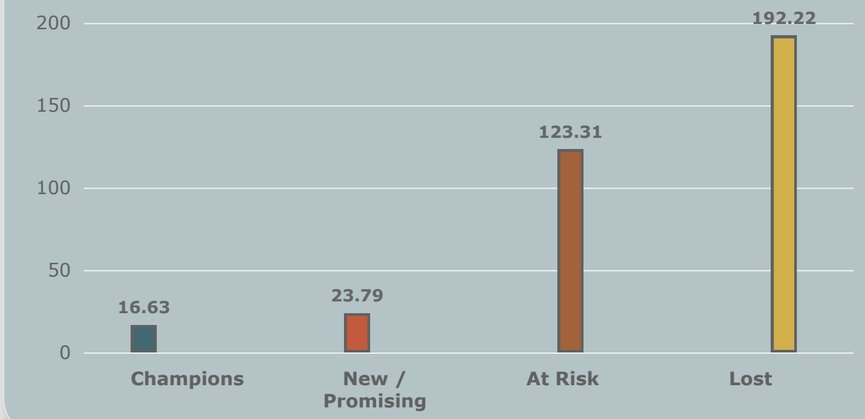

- Champions (31% of customers) generate the highest average spend ($4.7K) nearly 3x more than At Risk.

- At Risk segment hasn't purchased in ~123 days on average, despite still showing meaningful spend — strong candidate for win-back campaigns.

- Difference in spend between Champions and At Risk is statistically significant (t=8.15,p<0.001), confirming this isn't random variation.

- Lost segment (30%) shows minimal recent activity and lowest frequency — low-priority for retention spend.
